

Localized radio is not a problem to me. I really would'nt trust XM to provide that anyway. However i did buy the equipment and pay a monthly fee with the understanding that my service would be provided as promised. XM has provided. But now i see other interests want to stem the flow. WHAT??? The advertisers don't want to pay the local broadcasters anymore? How many radio stations are there in this country? I listen to a couple here myself. But i still pay for XM and i would like to keep it that way. After all we PAY for it.
